ABOUT

Riga Pharma Group brings together three pharmaceutical manufacturers — Silvanols, RFF and Jonnex-Farma — into one strong, export-focused partner.

Together we boast many decades of expertise in developing and producing food supplements, medical devices, cosmetics, and OTC medicines using natural ingredients.

We combine science-based product development, pharmaceutical manufacturing expertise and international market experience to deliver leading brands, market-ready private labels and flexible contract manufacturing services with full cycle product development capabilities.

Riga Pharma Group is a leading market player in Baltic region with a strong focus on export development.

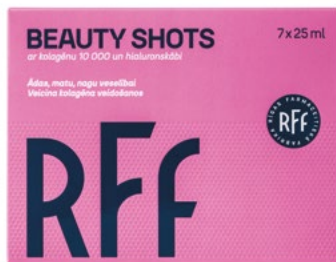

Stronger together. Trusted worldwide.

SERVICES

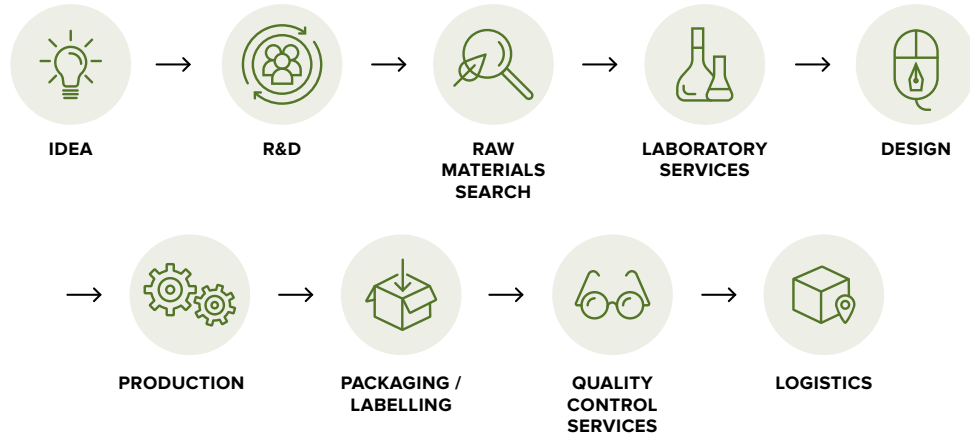

SERVICES

CONTRACT MANUFACTURING SERVICES

With expertise in developing and producing food supplements, medical devices, cosmetics, and OTC medicines using natural ingredients, we can offer both branded and private label products.

Our product portfolio consists of over 100 original products, researched and developed in our factories.

We offer a comprehensive and flexible range of services from formula development to the manufacturing and supply of the final product.

R&D

Our specialists will provide you with professional assistance from the initial idea of a product through to its final stage of production.

We will coordinate the creation of your product formula, keep you regularly updated during all stages of creation and production, and offer advice on how to ensure that your product has a distinctive presence in the market.

QUALITY

All products are tested in accordance with the highest standards required in drug manufacturing. After microbiological and heavy metal testing of each batch, we issue a Certificate of Analysis (COA). We control all stages of product manufacturing – from the quality of raw materials to pharmacovigilance.

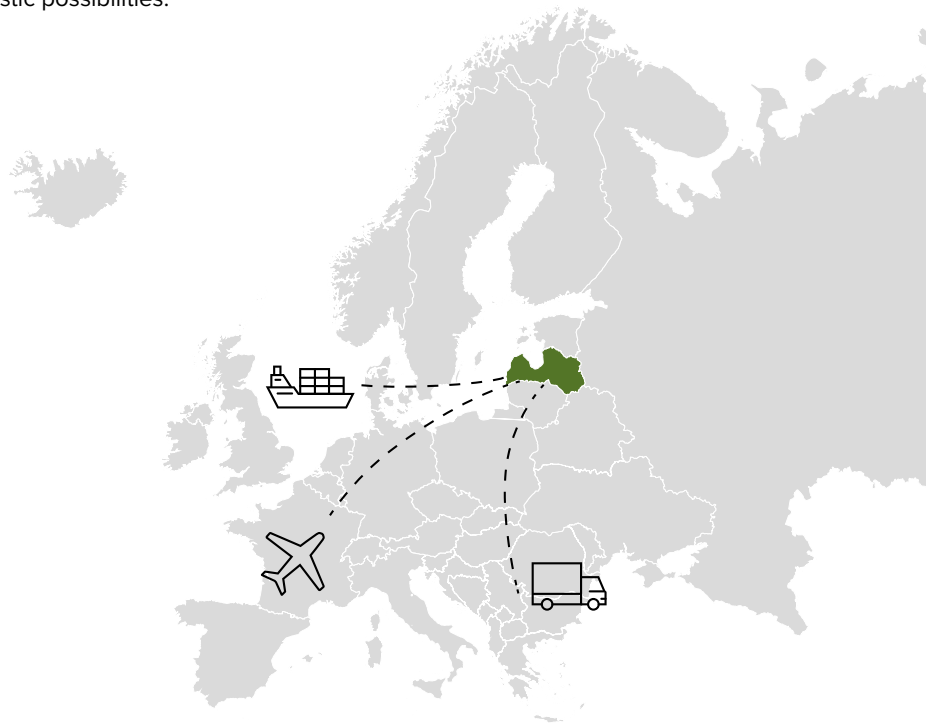

Production quality is assured by GMP, ISO 22000, ISO 13485, and HACCP certificates.

SERVICES

LOGISTICS

Our manufacturing and warehousing facilities are located in Riga, Latvia, within the European Union. This strategic geographic location offers extensive and convenient logistic possibilities.

OUR ADVANTAGES

Small initial batches: an opportunity to create a safe start-up for the product with balanced risks and reduced investments – ideal for small companies starting a business or large companies testing products.

European quality: a scientific and innovative approach to safe and effective product development and production, with certified quality control systems.

Full-cycle service: ranging from 60 days to 9 months, depending on the product's specifics.

Flexibility: customer service-oriented with the ability to adapt to individual needs.

Geographic location: convenient for logistics.
